[1] Includes persons born in Alaska, persons born at sea under the United States flag, and American citizens born abroad. The inclusion of these classes does not affect the per 10,000 distribution by place of residence, and accordingly the figures for continental United States are the same as those given for the United States.

[2] Not including Indian Territory and Indian reservations.

[1] Includes persons born in Alaska and persons born at sea under the United States flag. The inclusion of these classes does not affect the per 10,000 distribution by place of residence, and accordingly the figures for continental United States are the same as those given for the United States.

[2] Not including Indian Territory and Indian reservations.

[1] Includes persons born in Alaska and persons born at sea under the United States flag. The inclusion of these classes does not affect the per 10,000 distribution by place of residence, and accordingly the figures for continental United States are the same as those given for the United States.

[2] Not including Indian Territory and Indian reservations.

[1] Includes persons born in Alaska, persons born at sea under the United States flag, and American citizens born abroad. The inclusion of these classes does not affect the per 10,000 distribution by place of residence, and accordingly the figures for continental United States are the same as those given for the United States.

[2] Not including Indian Territory and Indian reservations.

[1] Includes persons born in Alaska, persons born at sea under the United States flag, and American citizens born abroad. The inclusion of these classes does not affect the per 10,000 distribution by place of residence, and accordingly the figures for continental United States are the same as those given for the United States.
[2] Not including Indian Territory and Indian reservations.
[3] Less than 1 in 10,000.
